

West Virginia Interfaith Power & Light

TREES OF LIFE CAMPAIGN

www.wvipl.org | westvaipl@gmail.com

Trees absorb carbon dioxide, so the CO₂ they capture doesn't stay in the atmosphere doing damage to our planet. Planting trees, then, is a way to help "clear the air!"

WHY?

It is also a fun and easy way to engage with nature, care for our common home, and help build fellowship among your community members!

WHO?

In short, any community group that wishes to plant trees as part of our campaign is welcome.

WHERE?

You can plant them anywhere you want! It could be land that belongs to your group, or individuals from your group planting on their private property, for example.

WHAT?

Need recommendations for what kind of trees or where to get them? Please contact us or see our website. Also, plant as few or many as you wish!

WHEN?

Any time this year. Groups can decide what works best for them.

After you plant, please go to www.wvipl.org and fill out the quick form to let us know about your participation in the campaign!
